Gartner Security & Risk Management
Summit 2018

June 4 – 7 / National Harbor, MD
gartner.com/us/securityrisk

Securing Digital Business: Adapt. Transform. Scale.

The premier gathering of security and risk management leaders, Gartner Security & Risk Management Summit 2018 delivers the insight you need to guide your organization to a secure digital business future.

Bring your team to maximize learning — participate in relevant sessions together, or split up to cover more ground and share your session take-aways later. To help you navigate this year's agenda, we recommend mapping sessions to individual roles of your team.

Your team could include:

Team leaders — CISOs, CSOs, CTOs, CIOs, CROs, CPOs, EVPs, SVPs, VPs and directors

Discover:

- How to effectively communicate security messages
- Talent management and security organization
- Strategy and program management
- Implications of blockchain for security and risk management

Suggested sessions

- Leadership Vision for Security and Risk Management, 2018
- Top Trends in Security for 2018
- What Security & Risk Leaders Should Do With Blockchain Enthusiasm
- What Your Board Wants to Know
- A Simple Framework for Security Analytics
- The 5 Security Roles You Must Plan for in the Digital Era
